

NKG2D Ligand expression in hDRG

Wangzhou et al., 2020

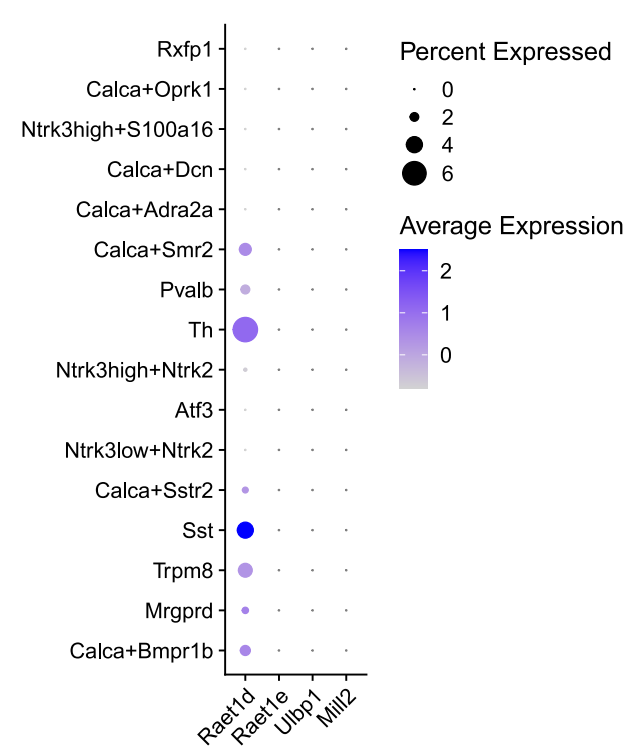

4 days in vitro vs immediately frozen ganglia from donors. RAET1E not detected in any cultures, but low expression in dissected ganglia. Possibly a different timeline in human DRG, or they don't show quite the same injury response to culturing that mouse DRG do. Also, poor sequencing quality.

Ray et al., 2023

Thoracic vertebrectomy cohort of neuropathic pain. Not clear increase with pain (no significant regulation), but clear expression across donors. (n ~50). Largest bulk RNA-seq cohort we have.

snRNA-seq, Bhuiyan et al., 2024

Visium, Tavares-Ferreira et al., 2023
